---

Tom –

Per our conversation, I'm send you some material to familiarize yourself with the topic of Automated License Plate Readers. Our hope is to engage the City on this topic in the near future with the hope of transitioning our Public Safety Surveillance Camera system into ALPRs.

Attached, you will see a PDF with an example of a staff report sent to City Council when Ventura PD made their first ALPR purchase.

Below is an example of a Lexipol Policy from the Fresno County Sheriff's Department: https://www.fresnosheriff.org/images/pdfs/p_p_428_automated_license_plate_readers_alpr.pdf.

The Company we are interested in using is https://www.flocksafety.com/.

There seems to be many references to Civil Code 1798.90.51 through 1798.90.55. Looks like it is required that we take this project to City Council, and provide an opportunity for public comment.

If you have any concerns, or topics we should discuss, please let me know.

Thank you,

Dan
